Reasons for Allowance

1. The following is an Examiner's Statement for reasons for allowance:

Claims 1-9, 13-16, 18 and 20 are considered allowable since when reading the claims in light of the specification, as per the MPEP §2111.01 or *Toro Co. v. White Consolidated Industries Inc.*, 199 F.3d 1295, 1301, 53 USPQ2d 1065, 1069 (Fed. Cir. 1999), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including a computer-implemented method, comprising: displaying a graphical user interface (GUI) on a display device of a computer, the GUI including a representation of a condition of a user-defined rule to process textual information and a representation of an action of the user-defined rule to process textual information, wherein the condition includes an attribute name, an operator, and an attribute value and wherein the action includes an action name and an action value; receiving user input via the GUI, the user input indicating the user-defined rule is to be used to create a rule template; creating, in response to the received user input, a rule template having a condition that is based upon the condition of the user-defined rule and an action that is based upon the action of the user-defined rule, wherein the condition of the rule template includes the attribute name and the operator from the corresponding condition of the user-defined rule, wherein the condition of the rule template further includes an attribute-value placeholder that is associated with the attribute value from the corresponding condition of the user-defined rule, wherein the action of the rule template further

Art Unit: 2129

includes the action name from the corresponding action of the user-defined rule, and wherein the action of the rule template further includes action value placeholder that is associated with the action value from the corresponding action of the user-defined rule; receiving a second user input that indicates a value to be used in place of the attribute- value placeholder and a value to be used in place of the action-value placeholder; creating, in response to the second user input, a second user-defined rule to process textual information, the second user-defined rule being based on the rule template and including the value to be used in place of the attribute-value placeholder and the value to be used in place of the action-value placeholder; storing the second user-defined rule in computer-readable medium on a storage device for later use in processing textual information, wherein the second user defined rule includes a condition that includes the attribute name of the condition of the rule template, the operator of the condition of the rule template, an attribute value corresponding to the value to be used in place of the attribute-value placeholder, and wherein the second user defined rule further includes an action that includes the action name of the action of the rule template and an action value corresponding to the value to be used in place of the action-value placeholder; using the second user-defined rule to process incoming textual information received from a customer system; and triggering the action of the second user-defined rule when the incoming textual information satisfies the condition of the second user-defined rule as specified in claims 1, 18 and 20.

2. The closest prior art (U. S. Patent 6057841, referred to as Thurlow) displaying a graphical user interface (GUI) on a display device of a computer, the GUI including a representation of a condition of a user defined rule to process textual information and a representation of an action of a user defined rule to process the textual information (**Thurlow**, Figure 6a; 'GUI' of applicant is equivalent to the screen shot (item 600) of Thurlow.), wherein the condition includes an attribute name, an operator, and an attribute value (**Thurlow**, C10:13-25; 'Condition' of applicant is equivalent to the Boolean expression for each natural language condition or exception clause is of the form : [property], [comparison of], and [value] of Thurlow. It follows that 'attribute name' of applicant is equivalent to 'property' of Thurlow. 'Operator' of applicant is equivalent to 'comparison of' of Thurlow. 'Attribute value' of applicant is equivalent to 'value' of Thurlow.) and wherein the action includes an action name and an action value (**Thurlow**, C10:26-34; 'Action' of applicant is equivalent to the machine readable format for each natural language action clause is of the form: [action], [parameter 1], [parameter 2], [parameter n]. It follows that 'Action name' of applicant is equivalent to 'action' of Thurlow. 'Action value' of applicant is equivalent to 'parameter 1' of Thurlow.), receiving user input via the GUI, (**Thurlow**, C10:26-34; 'Receiving user input' of applicant is equivalent to 'the user works through the process of selecting available conditions' of Thurlow.) receiving a second user input that indicates a value to be used in place of the attribute value placeholder and a value to be used in place of the action value place holder (**Thurlow**, C3:22-32; Thurlow indicates that multiple users are

Art Unit: 2129

allowed to build and edit rules. Thus 'receiving a second user input that indicates a value to be used in place of the attribute value placeholder and a value to be used in place of the action value place holder' is equivalent to allowing users to editing a rule of Thurlow.), creating in response to the second user input, a second user defined rule to process textual information, the second user defined rule being based on the rule template and including the value to be used in place of the attribute value placeholder and the value to be used in place of the action value placeholder(Thurlow, C3:22-32; Thurlow indicates that multiple users are allowed to build and edit rules. Thus 'creating in response to the second user input, a second user defined rule to process textual information' is equivalent to users editing a rule of Thurlow.), storing the second user defined rule in a computer readable medium on a storage device for later use in processing textual information(Thurlow, C2:19-46; 'Storing' of applicant is equivalent to 'the rule is then stored' of Thurlow.), wherein the second user defined rule includes a condition that includes the attribute name of the condition of the rule template, the operator of the condition of the rule template, an attribute value corresponding to the value to be used in place of the attribute value placeholder(Thurlow, C10:13-25, C10:64 through C11:25; 'Condition' of applicant is equivalent to the Boolean expression for each natural language condition or exception clause is of the form : [property], [comparison of], and [value] of Thurlow. It follows that 'attribute name' of applicant is equivalent to 'property' of Thurlow. 'Operator' of applicant is equivalent to 'comparison of' of Thurlow. 'Attribute value' of applicant is equivalent to 'value' of Thurlow.

'Placeholders' of applicant is equivalent to 'variables' of Thurlow. The variables of Thurlow are indicted by the underlined portions.), and wherein the second user defined rule further includes an action that includes the action name of the action of the rule template and an action value corresponding to the value to be used in place of the action value placeholder (**Thurlow**, C10:26-34, C10:64 through C11:25; 'Action' of applicant is equivalent to the machine readable format for each natural language action clause is of the form: [action], [parameter 1], [parameter 2], ..., [parameter n]. It follows that 'Action name' of applicant is equivalent to 'action' of Thurlow. 'Action value' of applicant is equivalent to 'parameter 1' of Thurlow. . 'Placeholders' of applicant is equivalent to 'variables' of Thurlow. The variables of Thurlow are indicted by the underlined portions.), using the second user defined rule to process incoming textual information received from a customer system (**Thurlow**, C1:22-54; 'Textual information' of applicant is equivalent to 'e-mail' of Thurlow.), and triggering the action of the second user defined rule when the incoming textual information satisfies the condition of the second user defined rule. (**Thurlow**, C1:22-54; 'Triggering the action' of applicant is equivalent to 'automatically execute specific tasks' of Thurlow. 'Satisfies the condition' of applicant is equivalent to 'when user provided criteria are met' of Thurlow.)

Art Unit: 2129

3. The references either by themselves or in combination fail to teach the user inputs indicating the user defined rule is to be used to create a rule template creating in response to the received user input, a rule template having a condition that is based upon the condition of the user defined rule and an action that is based upon the action of the user defined rule wherein the condition of the rule template includes the attribute name and the operator from the corresponding condition of the user defined rule wherein the condition of the rule template further includes an attribute value placeholder that is associated with the attribute value from the corresponding condition of the user defined rule wherein the action of the rule template further includes the action name from the corresponding action of the user defined rule wherein the action of the rule template further includes action value placeholder that is associated with the action value from the corresponding action of the user defined rule.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled 'Comments on the statement of reasons for allowance.'
